

## Working Prototype Known Problems Report

Product Name: Tutor Trade

Team Name: Verve Slug Academics

Date: July 23, 2019

### List of functions not working correctly:

#### Landing Page:

- No Errors to Report

#### About Page

- No Errors to Report

#### Contact Page

- No Errors to Report

#### Profile Page

- No Errors to Report

#### My Profile Page

- Current major should not allow numerical entries.

#### SignupPage

- Signup page still redirects to incorrect error page when the user inputs an incorrect email address such as "a@e"; Resulting HTTP Error at/postsignup/ code 400 "message": "INVALID\_EMAIL"
- When user signs up the redirected page should display "knowledge.html" and not postsignup

#### Knowledge Board Page

- Knowledge Board (clicking "close" button) closed post still allow requests to be made on the knowledge\_content page.
- Knowledge Board, if status is closed... user should not be allowed to click on "close" button

- After searching you cannot go back to all post.

#### Knowledge\_content Page

- If the user sends a request, the user should only be allowed to send one request, and not be able to send multiple requests for the same post, thus leading to an accumulation of excessive requests from the same user.

#### Post Page

- User should not be able to make a blank post, fields should populate with fill in the blanks \*mandatory, or be given an option to go back a page.

#### Session Persistence

- When you close a window while your still logged in, and you reopen the link to the website you may access the Profile Page/Edit Profile and Knowledge Board. However, when you do so... This leads to an undefined user when you post, and effects firebase by altering the last logged in user.
- Your session becomes invalid and displays an Invalid Token Page Error after one hour of session. You have to log out to avoid this situation.
